

Terminal and Office Operations: Honolulu

Environmental Aspect

Matson's office and terminal operation activities can interact with the environment.

Operational Aspect

Matson's office and terminal operations may potentially impact the environment by depleting renewable and nonrenewable resources.

Environmental Objective

Matson employees reduce the environmental impact of office and terminal operations by:

- Minimizing printing,
- Using non-disposable cups and utensils,
- Conserving electricity,
- Using public transportation and carpooling,
- Appropriately disposing of recyclable items, and
- Participating in local cleanups such as International Coastal Cleanup Day.

Environmental Targets for 2008

- Decrease paper purchases by 10% compared to 2006 baseline.
- Complete an energy audit with Hawaiian Electric Company by November 2008.
